1.2 Scope of patient/client health care records

Patient and client health care records document an individual’s health evaluation, diagnosis, treatment, care, progress and health outcome. These records should be created and maintained in accordance with:

- the principles outlined in NSW Department of Health Circular No 98/59 Principles for the creation, management, storage and disposal of health care records
- policies and procedures contained in the Department’s Patient Matters Manual and Health Records and Information Manual for Community Health Facilities
- any guidelines or directives that may be issued by the Department from time to time.

Records relating to the provision of treatment and care to a patient/client include (but are not limited to) records relating to or of a patient's/client’s:

- admission, including medical and nursing records
- history (medical and social of the patient or their family)
- examination results (physical or other)
- transfer, referral or assessment documentation
- correspondence between the patient or their representative and the health care service
- consultation reports (medical or other)
- principal diagnosis and any other significant diagnosis
- medication or drug orders and medication administered or prescribed (including oral, parenteral and incident reports)
- nursing care (including all versions or revisions of nursing care plans) and clinical pathways observations
- counselling, allied health, social work or other health care professional notes
- allergies or special conditions
- doctor’s or physician’s orders
- all observations and progress notes (including those recorded on separate sheets)
- problem lists (master or other)
- requests for and results or reports of all laboratory, diagnostic or investigative tests or procedures performed (including pathology, X-ray or other medical imaging examinations)
- consent or authority to carry out any treatment, procedure or release of information and certification that consent is informed (including removal or donation of tissue or
organisms, consent to special procedures etc. See also NSW Health Department Circular No 99/16 Patient information and consent to medical treatment

- refusal of treatment or withdrawal of consent
- prenatal, obstetric, newborn and perinatal treatment, care and outcomes (includes newborn records and perinatal morbidity statistics)
- surgical procedure or operation (including pre-operative checklists, anaesthetic records and peri operative nurses reports including instrument and swab count records and post operative observations)
- all therapeutic treatments or procedures (including anti-coagulant, diabetic, dialysis, electric shock therapy (EST) and electro convulsive therapy (ECT))
- statements made for the Police and Coronial Inquest Reports
- discharge (includes final diagnosis, operative procedures, summary or letter of discharge and discharge at own risk or against advice)
- death (includes autopsy or post-mortem reports).

<td>Group A Hospitals³ (viz Principal Referral Groups A and B, Paediatric Specialist and ungrouped Acute hospitals) - records of discharged or deceased in-patients</td>
<td>Retain: - minimum of 15 years after last attendance or official contact or access by or on behalf of the patient⁴, or</td>
</tr>
</tbody>
</table>

¹ See Part 1, section 1.2 above for the scope of records relating to or of a patient's/client's treatment and care.
² Health care records are to incorporate original observations. Transcribing is not an endorsed practice and should be avoided. Summary records are to be managed in accordance with the purpose for which they were created.
³ The term 'teaching' previously used to categorise hospitals has been replaced with the groups as listed in the NSW Health Department document NSW Peer Hospital Groups 2001/02. Hospitals listed under 1.1.1 are groups A1a, A1b, A2 and A3. Hospitals listed under 1.1.2 (Groups B to F) cover all hospitals, nursing homes, rehabilitation facilities, hospices, Multi Purpose Services etc that are not Group A Principal Referral, Paediatric Specialist or ungrouped Acute hospitals. If any further groups are added beyond F they will fall into this category and should retain records in accordance with the minimum retention periods identified for this category.
⁴ 'Access by or on behalf of the patient' refers to any use made of the record or access to the records for any purpose directly concerning the patient, such as attendance by the patient, provision of a report to another health care worker or agency, access under subpoena, inspection by the patient or their legal representative. Access for research, quality assurance, audit or educational purposes or by next of kin checking medical history does not constitute 'access by or on behalf of the patient'.

<td>Retain minimum of 3 years after last action, then destroy</td>
</tr>
</tbody>
</table>
| 1.14.0 | **Legal matters and incident management**  
Records relating to the management and handling of complaints, incidents, investigations or litigation involving the health facility and its patients/clients. Records include but are not necessarily restricted to correspondence between the health facility and solicitors or legal defence organisations regarding a patient of the facility, complaint files, incident reports and associated records of investigations into the incident or complaint. | Required as State archives |
| 1.14.1 | Records relating to issues, claims or case matters:  
of major public interest or controversy, or which are precedent setting in nature, or which result in significant changes to the service’s or facility's policy or procedures | Retain minimum of 15 years after legal action is completed and resolved (where known) or after last contact for legal access purposes, then destroy |
| 1.14.2 | Records relating to other issues, claims or case matters involving legal action | |

---

8 Where possible these records should be filed and maintained as part of the main (unit) patient/client record and retained accordingly. If there is no record of the patient, note receipt of the correspondence in the correspondence log book or register and return to sender.

9 Where possible a copy of any request/referral form is to be filed and maintained as part of the main (unit) patient/client record and retained accordingly. This retention period encompasses Health Insurance Commission requirements to retain private patient referrals/requests for at least 18 months.

10 A copy of any incident report or notification is to be filed and maintained as part of the main (unit) patient/client record and retained accordingly. Correspondence and associated records relating to the handling of these matters should be filed and maintained separately from the individual patient record.

11 Records of an investigation into or analysis of the cause of an incident (Root Cause Analysis) are to be appropriately managed and retained in accordance with the retention periods identified in this section.

<td><strong>Patient Master Index (PMI), Number register (eg card register) or equivalent¹⁵</strong></td>
<td></td>
</tr>
<tr>
<td></td>
<td>This includes records relating to the names and medical record numbers of clients or admitted patients of hospitals, health care facilities and services. In addition to the patient's name and medical record number, details recorded may also include date of birth, sex, address and other relevant details to assist patient identification. Where the PMI or its equivalent maintains a record of summary patient admission and discharge registration details not recorded elsewhere</td>
<td>Retain until no longer required for administrative purposes, ¹⁶ then destroy</td>
</tr>
</tbody>
</table>

¹⁴ Records relating to the registration, identification, admission, discharge, transfer etc of patients/clients maintained in electronic formats must be maintained in a readily accessible format for as long as they are required to be retained in accordance with the identified minimum retention period for the class of record they constitute.

¹⁵ Services are required to create and maintain these records. The PMI or Number register is the key to locating an individual's patient record in the medical records filing system as it provides a link between the name of the patient and the facility's medical record number.

¹⁶ The index or register will need to be retained for as long as it is required for the purpose of locating individual patient records and, where the index or its equivalent records the details of the disposal of individual records, for an appropriate period thereafter to account for the disposal of individual patient records. Depending on other types of records maintained, the PMI may be required to be retained indefinitely.

</tr>
</thead>
</table>
| 2.1.2 | Disease and operation index<sup>17</sup>  
Recording for each disease, condition, operation or  
procedure code number the details of each in-patient  
having that diagnosis or having undergone that  
operation or procedure. | Required as State archives |
| 2.1.3 | Physicians index  
A record for each medical practitioner with admitting  
rights of the details of each patient attended by the  
practitioner during the period covered by the index. In  
addition to the patient's name, medical record number  
and all disease, condition, operation and procedure  
codes relating to each patient attended, details recorded  
may also include age, sex, date of admission, length of  
stay, discharge status and destination. | Retain minimum of 15 years after date of last entry, then destroy |
| 2.1.4 | Admission and discharge registers  
In addition to the details of the patient’s date of  
admission and discharge, details recorded may also  
include time of admission, patient's medical record  
number, address, sex, date of birth, next of kin,  
admitting diagnosis, discharge diagnosis and length of  
stay.  
Where the details recorded in the discharge register are  
duplicated in the admission register see 2.1.13 | Required as State archives |
| 2.1.5 | Register of births<sup>18</sup>  
A record of each birth occurring in the service or  
facility. This includes Birth and Labour Ward registers,  
confinement books or their equivalent. | Required as State archives |
| 2.1.6 | Death register<sup>19</sup>  
A record of each death occurring in the hospital or  
facility, including deaths on arrival (DOA’s).  
See 6.1.2 for death certificates | Required as State archives |
| 2.1.7 | Emergency Department register  
In addition to date of attendance and name of patient,  
details recorded may also include patient's medical  
record number, address, sex, date of birth, reason for | Required as State archives |

---

<sup>17</sup> Services are required to create and maintain these records. In addition to the patient's name, medical record number and disease/condition and operation/procedure codes relevant to each episode of care, details recorded may also include age, sex, date of admission, length of stay, discharge status and destination, responsible doctor or unit (name or code identifier), ward.

<sup>18</sup> Services are required to create and maintain these records. Information recorded should include date and time of birth, mother's name, sex of child and names of medical and nursing staff in attendance. Details recorded may also include mother's medical record number, age and address.

<sup>19</sup> Services are required to maintain this register in accordance with NSW Department of Health Circular no. 98/114 Register of Deaths.

<th>Disposal Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>3.2.0</td>
<td><strong>Diagnostic reports</strong></td>
<td>Records and reports documenting findings based on an analysis, evaluation or interpretation of recordings or procedures</td>
</tr>
<tr>
<td>3.2.1</td>
<td>Patient record copy</td>
<td>To be retained and disposed of in accordance with the type of patient record they comprise</td>
</tr>
<tr>
<td>3.2.2</td>
<td>Diagnostic service copy (that is originals or copies of diagnostic reports or findings maintained by the diagnostic service)</td>
<td>Retain minimum of 3 years after date of report, then destroy</td>
</tr>
<tr>
<td>3.3.0</td>
<td><strong>Recordings</strong></td>
<td>Recordings produced for or created as a result of diagnostic processes</td>
</tr>
<tr>
<td>3.3.1</td>
<td>Diagnostic visual, image or pictorial recordings. This includes x-rays, videotapes, films, photographs or equivalent image recordings</td>
<td>Release to patient upon request or retain: - minimum of 7 years after last attendance for diagnostic procedure, or - until patient attains or would have attained the age of 25 years, whichever is the longer, then recycle or destroy</td>
</tr>
<tr>
<td>3.3.2</td>
<td>Diagnostic graphical recordings, that is recordings or tracings of a graphical nature created via diagnostic measuring processes eg electroencephalograms, electrocardiograms, electromyograms or cardiotocograms, where there is an abnormality detected</td>
<td>Retain: - minimum of 7 years after last attendance for diagnostic procedure, or - until patient attains or would have attained the age of 25 years, whichever is the longer, then recycle or destroy</td>
</tr>
</tbody>
</table>

---

28 This retention period encompasses Health Insurance Commission requirements to retain private patient referrals/requests for at least 18 months.
29 The original or a copy of any diagnostic report should also be maintained as part of the main (unit) patient record and retained accordingly.
30 Recordings produced by diagnostic services should be retained in the originating department or area, for example radiographic films or diagnostically equivalent recordings should be retained in the Radiography/Radiology Department. If recordings are digitally stored the retention periods specified in this section are the minimum retention requirements for the records.
31 If a patient requests a diagnostic recording and the recording is not required for possible future treatment or other requirements, for example litigation, then the recording can be released subsequent to the patient signing for its release.
32 If it is known that the recordings could possibly be required for legal action or compensation claims, the recordings should be retained for appropriate time periods, that is at least until the legal action has been completed. If it is known that an adverse event has occurred the visual recording associated with that event should be retained until the matter has been resolved or for the minimum retention period as specified, whichever is the longer.

</table>

33 The records should be retained for as long as they might conceivably be required for the purposes of locating a recording or, where the records contain the details of the disposal of individual recordings, accounting for the disposal of the recording.
34 Retention periods for these records reflect current minimum standards considered acceptable for good laboratory practice in relation to the retention of laboratory records and diagnostic material established by the National Pathology Accreditation Advisory Council (NPAAC) *Retention of Laboratory Records and Diagnostic Material*, 3rd edition, 2002. Laboratories involved in biochemical, molecular genetics or newborn screening should refer to current NPAAC standards for details of specific requirements applying to them.
35 Details of requests for diagnostic procedures or tests should be recorded and maintained as part of the main (unit) patient record, ie as part of the progress notes or a copy of the request is attached to the file, and retained accordingly.
36 This retention period encompasses Health Insurance Commission requirements to retain private patient referrals/requests for at least 18 months.
37 The original or a copy of any diagnostic report, including autopsy/post-mortem reports, should also be maintained as part of the main (unit) patient record and retained accordingly.

---

48 Requisitions, prescriptions, orders etc for drugs of addiction, pentazocine or drugs listed in the Poisons and Therapeutic Goods Regulation 2002 Appendix B are to be maintained separately to other pharmaceutical supply records. Refer also to NSW Department of Health circular no. 97/10 Guidelines for the handling of medication in community based health services and residential facilities in NSW and 01/64 Policy on the handling of medication in NSW public hospitals.

49 Drug or medication charts comprising the medication orders written by medical staff and records of administration written by nursing or medical staff should be filed and maintained as part of the main (unit) patient record and retained accordingly. Services should note that this is longer than the 2 year period required by the Regulation.

50 See NSW Department of Health circular no. 2000/83 Section 100 highly specialised drugs program guidelines.

51 Consent forms for admitted patients are to be placed on the main patient (unit) record and retained and disposed of in accordance with the type of patient record they comprise. See 1.0.0 for patient health care records.

### RESEARCH MANAGEMENT

Management of the conduct of clinical and non-clinical research, trials or studies etc[^59]

*Note:* This does not apply to records created and maintained by Committees formed to oversee the conduct of research activities (e.g., Research Ethics Committees).

For records created prior to 1930 see 10.0.0

For records that have been duplicated by means of imaging technologies such as microfilming or digital scanning see 9.0.0

### Research projects, trials or studies

8.1.1 | Records relating to the conduct of clinical research. This includes records or documentation relating to the recruitment and consent of research participants, the collection and analysis of data, preliminary findings, surveys, and results. | Retain minimum of 15 years after date of publication or termination of the study, then destroy[^60] |

---

[^58]: Regard should be had to the expected life span of the equipment before destruction of records proceeds.

[^59]: Retention periods are based on recommendations for the retention of research data in Section 2.3 of the Joint National Health and Medical Research Council (NHMRC)/Australian Vice-Chancellor's Committee (AVCC) *Statement and Guidelines on Research Practice* (May 1977). See also the International Committee for Harmonisation (IHC) *Guidelines for Good Clinical Practice*, sections 4.9.4 and 4.9.5 and the NHMRC *National Statement on Ethical Conduct in Research Involving Humans* (1999).

[^60]: NHMRC guidelines recommend that where materials of a biological origin are being used in a clinical trial or research project records should be retained for appropriate periods of time to monitor effects and trace all participants in the event that late or long term effects emerge. Where the data is crucial to the substantiation of research findings and cannot readily be duplicated elsewhere, longer retention periods may also be appropriate.

</tr>
<tr>
<td>9.1.2</td>
<td>Master copies of imaged records</td>
<td>Retain in accordance with the retention period and disposal action that applied to the original record</td>
</tr>
</tbody>
</table>

61 Where possible requests to access records for research purposes should be maintained as part of the main (unit) patient record and retained accordingly.
62 Originals of records that have been imaged that are required as State archives and were created or received prior to January 1, 2000 are not to be destroyed.
63 The determination of appropriate retention periods for the originals of records that have been imaged must allow adequate time for data verification and audit requirements. Originals of records that have been imaged or duplicated in a way that does not comply with the requirements of the Evidence Act 1995 will need to be retained and disposed of in accordance with the requirements for the type of records they comprise.

*See* section 2.3 of Part 2 of this Authority for further guidance concerning proposals for the transfer of these records.
Part 2: Understanding and using the authority

2.1 Overview

Purpose
The purpose of issuing the General Retention and Disposal Authority - Public Health Services: Patient/Client records is to permit public health services and facilities to destroy certain health care records of patients and clients, after appropriate minimum retention periods have been met, and to identify which patient/client records are required as State archives.

Previous disposal authorisations superseded
This disposal authority supersedes previous disposal authorisation in the following authority:

<table>

<td>see 5.1.3</td>
</tr>
</tbody>
</table>

What records does this authority cover?
This Authority authorises the disposal of:

- records relating to the treatment and care of individual patients and clients within the NSW public health system, including records relating to the provision of allied health care and to research participants
- patient administration registers, systems and databases used to record summary information about patients and clients
- records relating to diagnostic imaging and pathology and laboratory services
- records relating to the supply and administration of pharmaceuticals, encompassing drugs, poisons and other substances
- records of notifications to prescribed bodies concerning patient medical conditions
- records relating to the management of patient/client finances and property during the period of their admission to a facility or service

Date range of records covered
Patient/client records listed in this authority created wholly or in part prior to 1930 are required as State archives (see also 2.3 below). For records created wholly after 1930 the minimum retention periods and disposal actions identified in this authority apply to the various classes of records listed.

What records are not covered
This Authority does not cover records relating to the management and administration of public health organisations. Records relating to general administration (ie not health sector specific), financial management and personnel are covered by the General retention and disposal authority: administrative records (GA28).
How long is this authority in force?
This authority will remain in force until it is superseded by a new authority or it is withdrawn from use by State Records.

Providing feedback
To suggest amendments or alterations to this authority please contact us via email disposal@records.nsw.gov.au or phone (02) 9673 1788.

Further assistance
To obtain assistance in the interpretation or implementation of this authority, or any of our general retention and disposal authorities, contact us via email disposal@records.nsw.gov.au or phone (02) 9673 1788.

2.2 Guidelines for implementation

Introduction
Comprehensive information about implementation of disposal authorities is found in State Records' guideline on sentencing records, guideline on destruction of records and procedures for transferring records as State archives.

Minimum retention periods
The authority specifies minimum retention periods for all records not required as State archives. A Service must not destroy or otherwise dispose of records before the minimum retention period has expired. Services may retain records for longer periods of time, subject to organisational need, without further reference to State Records. Reasons for longer retention can include legal requirements, administrative need, on-going research use or government directives.

Retention of electronic records
Electronic records must be protected and readily accessible for the specified minimum retention period. See Future Proof: Ensuring the accessibility of equipment/technology dependent records for information relating to managing the accessibility of electronic and other technology dependent records.

Destroying records
When the authorised minimum retention period has been reached, appropriate arrangements for the destruction of records may be undertaken without further reference to State Records, unless otherwise advised. Persons using the Authority should apply it with caution, bearing in mind that the authorisations for disposal are given in terms of the State Records Act only. It is the responsibility of the public office to ensure that all legal and other organisational requirements for retention of records have been met before disposing of any of its records. A public office must not destroy any records where the public office is aware of possible legal action, investigation or inquiry where the records may be required as evidence.

Transferring records required as State archives
Records identified in the Authority as being required as State archives should be prepared for transfer to State Record's custody and/or control only when they are no longer required for ongoing business use.

Transfer of ownership must be authorised
Regardless of whether a record has been authorised for destruction or is required as a State archive, a public office must not transfer ownership of a State record to any person or organisation without the explicit authorisation of State Records.
2.3 Records required as State archives

Introduction

Records which are to be retained as State archives are identified with the disposal action Required as State archives.

Pre 1930 records

Patient/client records listed in this authority created wholly or in part prior to 1930 are required as State archives (for example a file started in 1913 and ending shortly after 1930). Prior to proposing to transfer pre 1930 records as State archives services should contact State Records to discuss the condition, types, content and quantities of records involved. Some records may be subject to further appraisal and review if State Records does not consider their retention as State archives is warranted.

Identifying significant and unique collections of records

The provisions relating to significant or unique collections of patient records (see 1.12.0 in the table of authorised disposal actions) are included for special exceptions that may arise from time to time. Individual services may identify exemplary or significant collections or samples of records amongst their holdings that warrant ongoing retention as State archives. This may be because the service has taken a leading role in the development and delivery of new or specialised treatments or because the records:
- illustrate or provide comparative insight into the provision of services to particular community groups
- illustrate or provide comparative insight into aspects of treatment, care and the delivery of services over time
- document significant achievements or break throughs in research or relate to research of major national or international significance, interest or controversy
- document significant outbreaks of disease that represented major public health risks and their impact
- document critical points of change or developments in the treatment or management of a particular type of condition, illness or disease
- relate to the diagnosis, management, treatment of or research into particularly rare diseases or conditions and would significantly enhance and contribute to the existing body of knowledge of these diseases or conditions

This may encompass records relating to a particular time period or to the treatment of a particular illness or condition or records of a specific service, facility or research project. Services that think that they hold records of significance should contact State Records.

2.4 Records that have been imaged

This authority authorises the destruction of the originals of health care records that have been imaged provided that:
- the records are not State archives that were received or created prior to January 1, 2000
- the records are not of a class listed in the 'Exclusions' section of the General Retention and Disposal Authority - Imaged records (GDA 24)
- all requirements for retaining originals have been assessed and fulfilled
- copies are made which are authentic, complete and accessible
- copies are kept for the authorised retention period, and
- originals are kept for quality control purposes for an appropriate length of time after copying.
See *Future Proof: Ensuring the accessibility of equipment/technology dependent records* for information relating to managing the accessibility of technology dependent records and *Recordkeeping in Brief 11: Digital imaging and recordkeeping* for guidance concerning the use of imaging technologies.
Part 3: Acknowledgements and sources

Introduction
The General Retention and Disposal Authority – Public Health Services: Patient/Client Records has been developed as a result of extensive research and consultation. Drafts of the Authority were circulated widely for comment and feedback was received from many health sector organisations. Written sources used include legislation, publications and web sites.

Acknowledgements
State Records would like to acknowledge the following organisations who provided assistance and feedback in the development of the Authority:

- NSW Health - NSW Department of Health, Area Health Services, Children’s Hospital Westmead and Corrections Health Service
- Australian Medical Association
- Centre for the Study of Health and Society, University of Melbourne
- Health Information Management Association of Australia (NSW Branch)
- Institute of Nursing Executives (NSW & ACT)
- Dr Milton Lewis, Senior Research Fellow, School of Public Health, University of Sydney
- National Health and Medical Research Council
- NSW Chief Radiation Therapist Group
- NSW College of Nursing
- NSW Operating Theatre Association
- Red Cross Blood Transfusion Services
- Royal Australasian College of Radiologists
- School of Health Information Management, Faculty of Health Science, University of Sydney
- School of Health Services Management, University of NSW
- South Western Pathology Services

Index
The following index is provided to enable easy reference to records covered by the General Retention and Disposal Authority - Public Health Services: Patient/Client Records.

References
The index provides the reference number for either a specific entry or a section. Where the reference is to a section the index term may appear in several entries within that section. The index also includes cross references where appropriate.
A
Abuse 1.2.0
see also Physical Abuse or Neglect of Children (PANOC) Specialist Services
Accountable items (surgical procedures) 1.18.1
Accounts and finances (patient/client) 7.2.0
Acute hospital care 1.1.0
Addictive drugs 5.1.0
Admission
lists 2.2.1
recommendation forms
non-attendance 2.2.6
registers 2.1.4 see also Electronic patient administration systems
statistics 2.4.0
Admitted patients see Patients
Adoptions
social work records 1.4.2
Affidavits
copied records 9.1.4
Anatomical pathology
diagnostic results and reports
patient record copy 1.0.0, 4.2.7
diagnostic service copy 4.2.1 Specimens or samples 4.3.0
Applications
PADP aids, appliances and services 7.3.1
Therapeutic Drugs Administration application forms 5.1.7
to prescribe drugs of addiction 5.1.8
Appointment books 2.3.0
Appointment registers 2.3.0
